LLEYTON MAGAMA

Grambling, LA (Open to relocation) | +1 480-370-9238 | lmagama@gsumail.gram.edu | LinkedIn | Portfolio | GitHub

EDUCATION

Grambling State University | B.S. Computer Science **Expected Dec 2027**
GPA: **3.85/4.0** | **GSU Presidential Scholarship** | Dean's List 2025 *Grambling, LA*
Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Secure Cloud Architecture (Azure & AWS), Probability I & II, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, Java, C++, C, TypeScript, JavaScript, SQL, Swift
Frameworks & Data: React, React Native, FastAPI, Flask, pandas, PostgreSQL, SQLite, Redis, Firebase
Cloud & Tools: Microsoft Azure, AWS, GCP, Git, GitHub Actions (CI/CD), pytest, Docker, Code Review
AI: AI coding assistants (Claude), LLM APIs (Anthropic, OpenAI), LangChain, PyTorch

EXPERIENCE

Co-Founder | LOKO **May 2026 – Present**
Delivery, mobility & marketplace super-app in Zimbabwe · React Native, Firebase, WhatsApp AI agent · lokoglobal.org

- Co-lead a platform **live in Harare** connecting **customers, merchants, and drivers** for rides and delivery.
- Worked on **real-time location tracking**, the home experience, and sign-in in the **React Native** app.
- Co-led moving our **WhatsApp AI agent** from pilot to **production**, opening ride booking to all customers.
- Helped grow the marketplace to **977 live listings from 174 sellers** via WhatsApp seller groups.

Software Engineer (Co-Developer) | Pop-up Campus **Jul 2025 – May 2026**
Campus-events app · Swift, SwiftUI, Firebase · App Store

- Co-developed and shipped **v1.0** for Jackson State University, reaching **5,000+ downloads** at a **4.8★ rating**.
- Engineered **.edu-verified registration** and **session management**, shipping weekly through GitHub **code review**.
- Debugged **session tokens expiring** on some devices but not others, improving login reliability for students.

Software Engineering Intern | TELONE **Sep 2023 – Jan 2024**
Enterprise automation · Python, SQL, Flask, REST APIs · Harare, Zimbabwe

- Optimized **15+ SQL queries** and database operations, cutting execution time and speeding up reporting.
- Built **Python data pipelines** integrating **SQL databases** with **REST APIs**, replacing manual data collection.
- Built **5+ dashboards** on subscriptions and API health, turning stakeholder needs into data models.

PROJECTS

Trading Ambassador | *Real-time market analysis · Python, FastAPI, React, WebSockets* | *GitHub*

- Built a **real-time market analysis platform** that ingests live price data and detects **trading patterns**.
- Delivered **instant trader alerts** via Telegram and added an **economic-calendar feed** for market-moving events.
- Resolved a **race condition** causing **data loss under high load** by redesigning the data storage layer.
- Validated all detection logic with **59 automated tests** running in **GitHub Actions CI** on every commit.

OfferFlow | *AI career platform · React, TypeScript, FastAPI, PostgreSQL* | *GitHub*

- Built and deployed a **full-stack AI career platform** for tracking job applications and recruiters.
- Integrated the **Anthropic API** for **AI resume scoring**, resume tailoring, and **mock interviews** behind JWT auth.
- Managed **PostgreSQL** schema changes with Alembic and validated every API module with **57 pytest tests**.

Eye Diagnosis System | *Healthcare data pipeline · Python, Flask*

- Built a **healthcare data pipeline** that matches patient symptoms to eye conditions using **Jaccard similarity**.
- Generated **ICD/CPT-coded medical reports** automatically from raw patient CSV files.
- Added **schema validation** and **per-record error isolation** so one malformed row never fails the batch.

LEADERSHIP & ACTIVITIES

Fellowships: Google Cloud Career Launchpad (TMCF) | LinkedInOrLeftOut SWE Fellow | ColorStack | CodePath
Leadership: Membership Coordinator, African Students Association | NSBE Member
